EP EQUIPMENT PRO

EFL25-PRO

4-WHEEL LI-ION COUNTERBALANCE FORKLIFT 2.5T

2500 kg 3000 mm

Built to perform across diverse environments, the EFL Pro Series excels in warehouses, factories, logistics centers, ports, and construction yards. Its high ground clearance, large tires and IPX4 water resistance enable operation on uneven outdoor terrain, while its compact turning radius and quiet, emission-free power make it ideal for indoor use as well. Designed to replace traditional diesel forklifts, the EFL Pro provides high performance with reduced operating costs

SPECIFICATION	REF	UNIT	VALUE
Model designation			EFL25-PRO
Battery voltage/nominal capacity		V/Ah	80V280AH
Rated capacity	Q	kg	2500
Load centre distance	c	mm	500
Service weight		kg	4450
Height, mast lowered	h_1	mm	2090
Lift	h_3	mm	3000
Height, mast extended	h_4	mm	4060
Overall length	l_1	mm	3610
Overall width	b_1/b_2	mm	1154
Length to face of forks	l_2	mm	2540
Fork dimensions	s/e/l	mm	40×122×1070
Turning radius	Wa	mm	2260
Drive			Electric
Operator type			Seated
Load distance, centre of drive axle to fork	x	mm	495

Features

Unmatched Performance and great operator experience

Powered by a 17kW AC driving motor and 30kW PMS pump motor system, the EFL PRO achieves performance, gradeability and residual capacity in line with the best electric forklift with the advantage of the high ground clearance, the big size tires and robust chassis.

EFL PRO hydraulic system feature:

- Full-proportion solenoid valve for a more accurate micro-control
- PMS pump motor and screw type pump for precise and silent hydraulic operation
- Big diameter hydraulic tubing for high oil flow also on the attachments

Sleek Appearance with Enhanced Versatility

The EFL PRO Series combines a sleek, fully-molded design with outstanding stability, thanks to its extended 1753 mm wheelbase. Despite its robust stance, key dimensions—such as width and turning radius—remain comparable to standard electric forklifts, ensuring versatility in any application. Modern LED lighting enhances visibility and reinforces its contemporary look, while the electric parking brake and automatic stop on ramp further elevate safety and control.

State of the art controls on the armrest

Multiple functions are integrated at the palm-size end with fingertip or joystick and includes:

forward/reverse direction switch, lifting/lowering, tilting, sideshift and 4th way, horn, turning light switch, Storage box and USB port, emergency switch

Optional: fork leveling button,clamp interlock button, 5th way button switch can complete the operator controls

Informative and Multi-functional Full-touch Display

The new OLED touchscreen display provides real-time monitoring of all key forklift operating parameters, including battery state of charge, driving speed, travel direction, wheel angle, operating hours, date and time. Optional functions such as and mast tilt angle, lift height and load weight indicators can also be integrated. Thanks to its touch interface, the operator can easily control all auxiliary systems, including the lighting system, wipers, and cabin heater.

Ergonomic Cabin for Fatigue-free and Convenient Operation

The EFL PRO's ergonomic design begins the moment the operator steps aboard, thanks to the largest access step in its class. Once inside, the EFL PRO features a offering a spacious driving area with a standard suspended seat with armrest. A reduced-size steering wheel, a tempered glass roof for enhanced visibility, and practical storage compartments further elevate the operator experience. For ease of service, power and auxiliary controllers are housed in a protected area accessible through removable panels.

Revolutionary Li-ion Battery and Charging System

At the core of the EFL PRO Series is EP's breakthrough Li-ion technology — a new Li-ion battery system composed of three independent battery modules operating in series to achieve 80V. Each module functions autonomously, ensuring consistent performance and enhanced reliability. This battery architecture enables power from 280Ah to 560Ah or 628Ah, allowing the EFL PRO to adapt its endurance to a wide range of applications. Furthermore, through a dedicated upgrade kit, the dealer is able to adjust such battery power capacity to meet evolving customer requirements.

Additionally, each battery module can be repaired or replaced individually, eliminating the costly full-pack replacements typically required when single cells fail. For further charging convenience, both integrated charging and external charging port are available on one truck making EFL PRO flexible for all kinds of applications needs.

Complete configuration including Telematic and innovative options

EFL PRO comes standard with ergonomic armrest equipped with fingertip or joystick hydraulic controls, automatic speed reduction on turns and with telematic system that allows to manage the fleet and the rental activities in an effective and efficient manner. The system tracks data for truck and battery usage, like uptime, battery status and real-time location. It allows dealers to monitor and analyze assets conditions, providing remote diagnostics and improving the efficiency of fleet management.

The following items are available as optional equipment:

Full cabin with integrated heater on the dashboard and operator feet; Load-leveling function activated at the press of a single button; Load height indicator; Load weight indicator; Panoramic OHG with glass roof; 360°Panorama System with human recognition and collision waring (no CE); ; Ambient-noise Adaptive Buzzer(no CE)
